Thin Solid Films 305 (1997) 361–365

Thin Solid Films

Subject Index of Volume 305

Adhesion
Vapor deposition of polyimide: segregation of partially reacted species at the polyimide/Si (100) interface, 26
α-Al_2O_3 film
Highly oriented α-alumina films grown by pulsed laser deposition, 243
Aluminium oxide
Dielectric properties of diamond film/alumina composites, 266
Amorphous materials
High performance polysilicon thin film transistors by H_2O plasma hydrogenation, 327
Anodization
Intense visible photoluminescence from molecular beam epitaxy porous $Si_{1-x}Ge_x$ grown on Si, 274
Atomic force microscopy
Growth and preferred crystallographic orientation of hexaphenyl thin films, 232
TiO_2 thin films formation on industrial glass through self-assembly processing, 110
Atomic force microscopy (AFM)
Influence of the initial nitrogen content in titanium films on the nitridation and silicidation processes, 185

Band structure
A study of the optical, electrical and structural properties of reactively sputtered InO_x and ITO_x thin films, 116
Barium oxide
Growth of (211) $BaTiO_3$ thin films on Pt-coated Si(100) substrates by radio frequency magnetron sputtering, 227
Barium strontium titanate
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30
Studies on structural and electrical properties of barium strontium titanate thin films developed by metallo-organic decomposition, 144
Buffer and seed layer
Influence of Al_2O_3 diffusion barrier and $PbTiO_3$ seed layer on microstructural and ferroelectric characteristics of PZT thin films by sol-gel spin coating method, 321

Cadmium selenide
Thermoelectric power of CdS and CdSe films deposited on vibrating substrates, 124
Cadmium sulphide
Optical characterization of vacuum evaporated cadmium sulfide films, 345
Template-assisted electrochemical deposition of ultrathin films of cadmium sulfide, 95
Thermoelectric power of CdS and CdSe films deposited on vibrating substrates, 124
Chemical vapor deposition
Graphite formation on Ni film by chemical vapor deposition, 351
Chemical vapor deposition (CVD)
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254
Chemical vapour deposition
Diamond deposition on as-anodized porous silicon: some nucleation aspects, 259
Chemical vapour deposition (CVD)
Dielectric properties of diamond film/alumina composites, 266
Effects of deposition parameters on composition, structure, resistivity and step coverage of TiN thin films deposited by electron cyclotron resonance plasma-enhanced chemical vapor deposition, 103
Effects of reaction kinetics on the microstructure of chemical vapour deposited copper films: experiment and simulation, 52
Radiation hardness of polycrystalline diamond thin films irradiated with 100 MeV I^{7+} ions, 88
Composition
Spectroscopic characterization of electron-beam evaporated V_2O_5 thin films, 219
Conductivity
Dopant influence on dielectric losses, leakage behaviour, and resistance degradation of $SrTiO_3$ thin films, 66
Ohmic and space-charge limited conduction in cobalt phthalocyanine thin films, 336
Copper
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254
Effects of reaction kinetics on the microstructure of chemical vapour deposited copper films: experiment and simulation, 52
Electrical control of surface electromigration damage, 286
Copper(I) hexafluoroacetylacetonate trimethylvinylsilane [Cu(hfac)(tmvs)]
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254

Deposition
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254
Deposition pressure
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254
Deposition process
Growth of (211) $BaTiO_3$ thin films on Pt-coated Si(100) substrates by radio frequency magnetron sputtering, 227
Metal oxide Co and Co–Fe–Cr films deposited on glass substrates from a metal-organic aerosol atomised by means of ultrasonic excitations, 210
Preliminary studies of thin metal oxide films prepared by deposition of an aerosol generated ultrasonically from aqueous nitrate solutions, 158
Pulsed laser deposition preparation and properties of $SrBi_2Ta_2O_9$ thin films, 48
Template-assisted electrochemical deposition of ultrathin films of cadmium sulfide, 95

Elsevier Science S.A.

Vapor deposition of polyimide: segregation of partially reacted species at the polyimide/Si (100) interface, 26
Diamond
Diamond deposition on as-anodized porous silicon: some nucleation aspects, 259
Dielectric properties of diamond film/alumina composites, 266
Radiation hardness of polycrystalline diamond thin films irradiated with 100 MeV I^{7+} ions, 88
Dielectric properties
Dielectric properties of diamond film/alumina composites, 266
Dopant influence on dielectric losses, leakage behaviour, and resistance degradation of $SrTiO_3$ thin films, 66
Pulsed laser deposition preparation and properties of $SrBi_2Ta_2O_9$ thin films, 48
Dielectrics
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30
Diffusion
Evaluation of HfN thin films considered as diffusion barriers in the Al/HfN/Si system, 297

Electrical properties
Ohmic and space-charge limited conduction in cobalt phthalocyanine thin films, 336
Electrical properties and measurements
Dopant influence on dielectric losses, leakage behaviour, and resistance degradation of $SrTiO_3$ thin films, 66
Pulsed laser deposition preparation and properties of $SrBi_2Ta_2O_9$ thin films, 48
Electrical resistivity
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254
Electrochemistry
Electrochemical properties of sol–gel deposited vanadium pentoxide films, 80
Template-assisted electrochemical deposition of ultrathin films of cadmium sulfide, 95
Electrodeposition
Tribological properties of nickel–copper multilayer film on beryllium bronze substrate, 292
Electromigration
Electrical control of surface electromigration damage, 286
Electron microscopy
Growth and preferred crystallographic orientation of hexaphenyl thin films, 232
Epitaxy
Ex situ wafer surface cleaning by HF dipping for low temperature silicon epitaxy, 280
Growth conditions of *c*-axis normal $Y_1Ba_2Cu_3O_{7-\delta}$ films on 20° tilted crystalline substrates, 304
Evaporation
Optical characterization of vacuum evaporated cadmium sulfide films, 345

Fatigue behavior
Influence of Al_2O_3 diffusion barrier and $PbTiO_3$ seed layer on microstructural and ferroelectric characteristics of PZT thin films by sol-gel spin coating method, 321
Ferroelectrics
Influence of Al_2O_3 diffusion barrier and $PbTiO_3$ seed layer on microstructural and ferroelectric characteristics of PZT thin films by sol-gel spin coating method, 321
Fourier transform infrared spectroscopy
Vapor deposition of polyimide: segregation of partially reacted species at the polyimide/Si (100) interface, 26
Friction and wear
Tribological properties of nickel–copper multilayer film on beryllium bronze substrate, 292

Fullerene
The (111) oriented growth of C_{60} films on GaAs(100) substrates, 22

Glass
Micropatterning of neurons using organic substrates in culture, 74
Grain size strengthening
Tribological properties of nickel–copper multilayer film on beryllium bronze substrate, 292
Graphite
Graphite formation on Ni film by chemical vapor deposition, 351
Growth mechanism
Growth conditions of *c*-axis normal $Y_1Ba_2Cu_3O_{7-\delta}$ films on 20° tilted crystalline substrates, 304

Humidity sensor
Humidity sensor using planar optical waveguides with claddings of various oxide materials, 330

Indium oxide
A study of the optical, electrical and structural properties of reactively sputtered InO_x and ITO_x thin films, 116
Ion bombardment
Radiation hardness of polycrystalline diamond thin films irradiated with 100 MeV I^{7+} ions, 88
Ion-exchange waveguide
Humidity sensor using planar optical waveguides with claddings of various oxide materials, 330

Kinetic study
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254

Langmuir–Blodgett films
Does the tail-to-head molecular arrangement exist in asymmetrically deposited fatty acid alkylester Langmuir–Blodgett multilayers?, 309
Template-assisted electrochemical deposition of ultrathin films of cadmium sulfide, 95
Langmuir–Blodgett films (LB films)
Ag^+ ion sensing by the polymer Langmuir–Blodgett films containing 1-aza-15-crown 5-ether group, 316
Laser ablation
Characterization of air-annealed, pulsed laser deposited ZnO–WS_2 solid film lubricants by transmission electron microscopy, 130
Highly oriented α-alumina films grown by pulsed laser deposition, 243
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30
Pulsed laser deposition preparation and properties of $SrBi_2Ta_2O_9$ thin films, 48
Lattice match
The (111) oriented growth of C_{60} films on GaAs(100) substrates, 22

MBE-SiGe
Intense visible photoluminescence from molecular beam epitaxy porous $Si_{1-x}Ge_x$ grown on Si, 274
Metallo-organic decomposition
Studies on structural and electrical properties of barium strontium titanate thin films developed by metallo-organic decomposition, 144
Microstructure
Effect of the pressure on the chemical vapor deposition of copper from copper hexafluoroacetylacetonate trimethylvinylsilane, 254
Effects of reaction kinetics on the microstructure of chemical vapour deposited copper films: experiment and simulation, 52
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30

Mobility coalescence
The effect of substrate vibration on mobility coalescence in silver island films, 196
Monolayers
Micropatterning of neurons using organic substrates in culture, 74
Monte Carlo simulation
Effects of reaction kinetics on the microstructure of chemical vapour deposited copper films: experiment and simulation, 52
Multilayer film
Tribological properties of nickel–copper multilayer film on beryllium bronze substrate, 292
Multilayer interface
Tribological properties of nickel–copper multilayer film on beryllium bronze substrate, 292
Multilayers
Does the tail-to-head molecular arrangement exist in asymmetrically deposited fatty acid alkylester Langmuir–Blodgett multilayers?, 309
Evaluation of HfN thin films considered as diffusion barriers in the Al/HfN/Si system, 297

Nickel
Graphite formation on Ni film by chemical vapor deposition, 351
Nitrides
Evaluation of HfN thin films considered as diffusion barriers in the Al/HfN/Si system, 297
Nucleation
Diamond deposition on as-anodized porous silicon: some nucleation aspects, 259

Oblique evaporation
Oblique evaporation and surface diffusion, 1
Optical coatings
A study of the optical, electrical and structural properties of reactively sputtered InO_x and ITO_x thin films, 116
Metal oxide Co and Co–Fe–Cr films deposited on glass substrates from a metal-organic aerosol atomised by means of ultrasonic excitations, 210
Preliminary studies of thin metal oxide films prepared by deposition of an aerosol generated ultrasonically from aqueous nitrate solutions, 158
Optical properties
Effect of crystal structure on optical properties of TiO_2 films grown by atomic layer deposition, 270
Metal oxide Co and Co–Fe–Cr films deposited on glass substrates from a metal-organic aerosol atomised by means of ultrasonic excitations, 210
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30
Optical and structural properties of reactive ion beam sputter deposited CeO_2 films, 191
Optical characterization of vacuum evaporated cadmium sulfide films, 345
Preliminary studies of thin metal oxide films prepared by deposition of an aerosol generated ultrasonically from aqueous nitrate solutions, 158
Optical spectroscopy
Electrochemical properties of sol–gel deposited vanadium pentoxide films, 80
Organic substances
Growth and preferred crystallographic orientation of hexaphenyl thin films, 232
Micropatterning of neurons using organic substrates in culture, 74
Ohmic and space-charge limited conduction in cobalt phthalocyanine thin films, 336
Oriented growth
The (111) oriented growth of C_{60} films on GaAs(100) substrates, 22
Oxidation
Characterization of air-annealed, pulsed laser deposited ZnO–WS_2 solid film lubricants by transmission electron microscopy, 130
Oxide cladding
Humidity sensor using planar optical waveguides with claddings of various oxide materials, 330
Oxides
Dopant influence on dielectric losses, leakage behaviour, and resistance degradation of $SrTiO_3$ thin films, 66
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30

P-E hysteresis
Influence of Al_2O_3 diffusion barrier and $PbTiO_3$ seed layer on microstructural and ferroelectric characteristics of PZT thin films by sol-gel spin coating method, 321
Phase transitions
Second harmonic generation and scanning tunnelling/atomic-force microscopy studies of tungsten-doped, amorphous-carbon films, 341
Photoluminescence
Intense visible photoluminescence from molecular beam epitaxy porous $Si_{1-x}Ge_x$ grown on Si, 274
Physical vapour deposition
Growth and preferred crystallographic orientation of hexaphenyl thin films, 232
Thermoelectric power of CdS and CdSe films deposited on vibrating substrates, 124
Plasma processing and deposition
Effects of deposition parameters on composition, structure, resistivity and step coverage of TiN thin films deposited by electron cyclotron resonance plasma-enhanced chemical vapor deposition, 103
High performance polysilicon thin film transistors by H_2O plasma hydrogenation, 327
Plasma spraying
Splat formation and cooling of plasma-sprayed zirconia, 35
Plasmons
Plasmon excitation in vanadium dioxide films, 61
Polymers
Ag^+ ion sensing by the polymer Langmuir–Blodgett films containing 1-aza-15-crown 5-ether group, 316
Vapor deposition of polyimide: segregation of partially reacted species at the polyimide/Si (100) interface, 26
Porous SiGe
Intense visible photoluminescence from molecular beam epitaxy porous $Si_{1-x}Ge_x$ grown on Si, 274
Pulsed laser deposition
Highly oriented α-alumina films grown by pulsed laser deposition, 243
On the microstructure and optical properties of $Ba_{0.5}Sr_{0.5}TiO_3$ films, 30
Pyrolysis
Metal oxide Co and Co–Fe–Cr films deposited on glass substrates from a metal-organic aerosol atomised by means of ultrasonic excitations, 210
Preliminary studies of thin metal oxide films prepared by deposition of an aerosol generated ultrasonically from aqueous nitrate solutions, 158
PZT
Influence of Al_2O_3 diffusion barrier and $PbTiO_3$ seed layer on microstructural and ferroelectric characteristics of PZT thin films by sol-gel spin coating method, 321

Radiation damage
Radiation hardness of polycrystalline diamond thin films irradiated with 100 MeV I^{7+} ions, 88

Raman scattering
Optical and structural properties of reactive ion beam sputter deposited CeO_2 films, 191

Scanning tunnelling microscopy (STM)
Second harmonic generation and scanning tunnelling/atomic-force microscopy studies of tungsten-doped, amorphous-carbon films, 341
Second harmonic generation (nth HG)
Second harmonic generation and scanning tunnelling/atomic-force microscopy studies of tungsten-doped, amorphous-carbon films, 341
Sensors
Ag^+ ion sensing by the polymer Langmuir–Blodgett films containing 1-aza-15-crown 5-ether group, 316
Silicides
Influence of the initial nitrogen content in titanium films on the nitridation and silicidation processes, 185
Silicon
Ex situ wafer surface cleaning by HF dipping for low temperature silicon epitaxy, 280
High performance polysilicon thin film transistors by H_2O plasma hydrogenation, 327
Silver
Ag^+ ion sensing by the polymer Langmuir–Blodgett films containing 1-aza-15-crown 5-ether group, 316
Silver island films
The effect of substrate vibration on mobility coalescence in silver island films, 196
Sol-gel
Influence of Al_2O_3 diffusion barrier and $PbTiO_3$ seed layer on microstructural and ferroelectric characteristics of PZT thin films by sol-gel spin coating method, 321
Splat formation
Splat formation and cooling of plasma-sprayed zirconia, 35
Sputtering
Evaluation of HfN thin films considered as diffusion barriers in the Al/HfN/Si system, 297
Growth of (211) $BaTiO_3$ thin films on Pt-coated Si(100) substrates by radio frequency magnetron sputtering, 227
Optical and structural properties of reactive ion beam sputter deposited CeO_2 films, 191
Structural properties
A study of the optical, electrical and structural properties of reactively sputtered InO_x and ITO_x thin films, 116
Does the tail-to-head molecular arrangement exist in asymmetrically deposited fatty acid alkylester Langmuir–Blodgett multilayers?, 309
Effect of crystal structure on optical properties of TiO_2 films grown by atomic layer deposition, 270
Optical and structural properties of reactive ion beam sputter deposited CeO_2 films, 191
Structure and optical properties
Spectroscopic characterization of electron-beam evaporated V_2O_5 thin films, 219
Superconductivity
Growth conditions of c-axis normal $Y_1Ba_2Cu_3O_{7-\delta}$ films on 20° tilted crystalline substrates, 304
Surface and interface states
Ex situ wafer surface cleaning by HF dipping for low temperature silicon epitaxy, 280
Surface diffusion
Electrical control of surface electromigration damage, 286
Oblique evaporation and surface diffusion, 1
Surface morphology
Second harmonic generation and scanning tunnelling/atomic-force microscopy studies of tungsten-doped, amorphous-carbon films, 341

Temperature dependence
Highly oriented α-alumina films grown by pulsed laser deposition, 243
Thin film deposition
Thin film deposition by reactive magnetron sputtering: On the influence of target oxidation and its effect on surface properties, 164
Titanium nitride
Effects of deposition parameters on composition, structure, resistivity and step coverage of TiN thin films deposited by electron cyclotron resonance plasma-enhanced chemical vapor deposition, 103
Influence of the initial nitrogen content in titanium films on the nitridation and silicidation processes, 185
Titanium oxide
Effect of crystal structure on optical properties of TiO_2 films grown by atomic layer deposition, 270
Transmission electron microscopy
Characterization of air-annealed, pulsed laser deposited ZnO–WS_2 solid film lubricants by transmission electron microscopy, 130
Ex situ wafer surface cleaning by HF dipping for low temperature silicon epitaxy, 280
Tribology
Characterization of air-annealed, pulsed laser deposited ZnO–WS_2 solid film lubricants by transmission electron microscopy, 130

Vanadium dioxide
Plasmon excitation in vanadium dioxide films, 61
Vanadium oxide
Electrochemical properties of sol–gel deposited vanadium pentoxide films, 80
V_2O_5 thin films
Spectroscopic characterization of electron-beam evaporated V_2O_5 thin films, 219

Water
High performance polysilicon thin film transistors by H_2O plasma hydrogenation, 327

XPS
Highly oriented α-alumina films grown by pulsed laser deposition, 243
X-ray photoelectron spectroscopy (XPS)
Thin film deposition by reactive magnetron sputtering: On the influence of target oxidation and its effect on surface properties, 164
X-ray diffraction
Does the tail-to-head molecular arrangement exist in asymmetrically deposited fatty acid alkylester Langmuir–Blodgett multilayers?, 309
Growth and preferred crystallographic orientation of hexaphenyl thin films, 232
Growth conditions of c-axis normal $Y_1Ba_2Cu_3O_{7-\delta}$ films on 20° tilted crystalline substrates, 304
Growth of (211) $BaTiO_3$ thin films on Pt-coated Si(100) substrates by radio frequency magnetron sputtering, 227
Highly oriented α-alumina films grown by pulsed laser deposition, 243
Influence of the initial nitrogen content in titanium films on the nitridation and silicidation processes, 185
Optical and structural properties of reactive ion beam sputter deposited CeO_2 films, 191
The (111) oriented growth of C_{60} films on GaAs(100) substrates, 22

Thermoelectric power of CdS and CdSe films deposited on vibrating substrates, 124
X-ray photoelectron spectroscopy
Electrochemical properties of sol–gel deposited vanadium pentoxide films, 80
Micropatterning of neurons using organic substrates in culture, 74
TiO_2 thin films formation on industrial glass through self-assembly processing, 110
Zirconia
Splat formation and cooling of plasma-sprayed zirconia, 35
